

# Ingredient scale ZW

## Basic technical information

---

<b>Scale type:</b>	ingredient scale ZWB
<b>Scale range:</b>	0 - 30 kg oder 0 - 60 kg
<b>Resolution:</b>	starting from 2 grams
<b>Scale bridge size:</b>	400 x 300 mm or according to requirements
<b>Construction material:</b>	stainless steel
<b>Operating terminal:</b>	option
<b>Online connection:</b>	backcontrol
<b>Installation place:</b>	table, stainless steel wall consoles or as movable/sliding scale

## Intended use

---

Manual ingredient weighing for very difficult or non-automatable ingredients, with online connection to the recipe computer.

## General function

---

Service-free component scale for fast and secure recipe processing or for bag filling via bag holder. Individual components will be sent by the recipe computer one after the other to the ingredient scale. As soon as one component is weighed, automatically the next one will be displayed. The limit of accepted dosing tolerance can be set. It is assured that the recipe accuracy remains within the desired tolerance and no component can be forgotten. All information about consumption statistics, storage conditions, reordering, calculations, etc. is available. All recipes are documented and traceable.

## Design

---

All surface parts are made from stainless steel. The support feet may be levelled with gentle table support. The cable connections to the computer are pluggable. Precision scale ZW2: max. 2 kg, resolution 0.5 g
